PROJECTS

CHECKLIST (HTML5, BOOTSTRAP5, CSS3 & JAVASCRIPT), *Lenovo Internal Project.*

06/2022 – 08/2025

- Web Page Development (Front-End)– Built real-time web pages (Home Page & Reporting Module page) from Figma mockup Design to Code using HTML, CSS, Bootstrap, and JavaScript. Gained practical experience in web page structuring, styling, and interactive functionality.

COLOUR FLIPPER (USING HTML CSS AND JS)

- Random Color Generation: Uses JavaScript to generate random hexadecimal color codes (e.g., FF5733) each time the button is clicked.
- Background Color Update: Dynamically changes the webpage's background color to the new random color.
- UserInteraction: Includes a button that, when clicked, triggers the color change, giving users control over the interface

BLOOD BANK MANAGEMENT SYSTEM (USING PYTHON AND MYSQL)

- This project particularly involves creating a Blood Bank Management System, where Python handles the backend logic while MySQL is used for data storage.
- The system allows for the efficient management of blood inventory, donor information, and blood requests, providing a user-friendly interface for administrators to streamline blood bank operations
